Comande a effectuer :

npm install

./mvnw

npm start

```
gallier@jeanmich:~/Documents/INFO4/G... x ./.mvnw x npm start x v
Application files will be generated in folder: /home/gallier/Documents/INFO4/GL/test

Documentation for creating an application is at https://www.jhipster.tech/creating-an-app/
If you find JHipster useful, consider sponsoring the project at https://opencollective.com/generator-jhipster

WARNING! Your Node version is not LTS (Long Term Support), use it at your own risk! JHipster does not support non-LTS rel
eases, so if you encounter a bug, please use a LTS version first.
? Which *type* of application would you like to create? Monolithic application (recommended for simple projects)
? What is the base name of your application? blog
? Do you want to make it reactive with Spring WebFlux? No
? What is your default Java package name? info4.gl.blog
? Which *type* of authentication would you like to use? JWT authentication (stateless, with a token)
? Which *type* of database would you like to use? SQL (H2, PostgreSQL, MySQL, MariaDB, Oracle, MSSQL)
? Which *production* database would you like to use? PostgreSQL
? Which *development* database would you like to use? H2 with disk-based persistence
? Which cache do you want to use? (Spring cache abstraction) Ehcache (local cache, for a single node)
? Do you want to use Hibernate 2nd level cache? Yes
? Would you like to use Maven or Gradle for building the backend? Maven
? Do you want to use the JHipster Registry to configure, monitor and scale your application? No
? Which other technologies would you like to use?
? Which *Framework* would you like to use for the client? Vue
? Do you want to generate the admin UI? Yes
? Would you like to use a Bootswatch theme (https://bootswatch.com/)? Superhero
? Choose a Bootswatch variant navbar theme (https://bootswatch.com/)? Primary
? Would you like to enable internationalization support? Yes
? Please choose the native language of the application French
? Please choose additional languages to install Albanian, Arabic (Libya), Armenian, Belarusian, Bengali
? Besides JUnit and Jest, which testing frameworks would you like to use? Cypress, Gatling, Cucumber
? Would you like to install other generators from the JHipster Marketplace? No
? Would you like to audit Cypress tests? No
Generating 2,048 bit RSA key pair and self-signed certificate (SHA256withRSA) with a validity of 99,999 days
for: CN=Java Hipster, OU=Development, O=info4.gl.blog, L=, ST=, C=

KeyStore '/home/gallier/Documents/INFO4/GL/test/src/main/resources/config/tls//keystore.p12' generated successfully.
